# Trần Đình Phi Hùng

FrontEnd Developer

0362370754 tdphihung0807@gmail.com github.com/PHung112 Thu Duc District, Ho Chi Minh City

## OBJECTIVE

Final-year Software Engineering student at HUTECH University with a focus on Fullstack Development. I am looking to leverage my academic foundation in Spring Boot and ReactJS to contribute to real-world projects, with a primary interest in developing responsive and user-friendly Frontend interfaces.

## EDUCATION

**Major : Software Engineering** *2022 - 2026 (Expected)*

Ho Chi Minh City University of Technology (HUTECH) University

- GPA : 3.33/4.0

## TECHNICAL SKILLS

| | |
|---|---|
| **Front-end:** | JavaScript, ReactJS, HTML, CSS, Tailwind CSS, Responsive Design. |
| **Back-end:** | Java, Spring Boot, RESTful API, Authentication (JWT/Basic Auth). |
| **Databases:** | MySQL, SQL Server, MongoDB. |
| **Tools & Others:** | Git, Postman, Swagger, Unit Testing (Basic). |

## PROJECTS

### DocumentSharing *May 2025 - Dec 2025*

**Position: Frontend Developer**

**Description:** An online document-sharing and community platform tailored for students. The system allows users to upload and download academic materials while fostering a collaborative environment through a blog-style interaction system. It features a subscription-based (Premium) model and a robust admin panel for managing users and documents.

**Project size:** 3

**Responsibilities:**

- Implemented Firebase Authentication (Google & Email) integrated with a custom Backend profile system.
- Developed a Document Management system with multi-step uploads, client-side compression, and PDF previews.
- Built a Premium/VIP subscription flow with QR payment and transaction status tracking.
- Developed an Admin Dashboard for document moderation, user reporting, and system statistics.
- Optimized UI performance with Debouncing, Lazy loading, and Memoization.

**Tech Stack:** React (Vite), HTML/CSS, Axios, Firebase Auth, RESTful API, Azure Blob Storage

**Github:**

- Frontend: https://github.com/Felix5124/document-sharing-frontend

### TaskManagement *Feb 2026 - Mar 2026*

**Position: Fullstack Developer**

**Description:** A comprehensive task management system designed for team collaboration, featuring project lifecycles, role-based access control (RBAC), and real-time notifications for seamless workflow management.

**Project size:** Personal Project

**Responsibilities:**

- Built a Fullstack task management system using Spring Boot and React.
- Developed Hybrid Auth (JWT & Google OAuth2) for secure, multi-method access.
- Integrated WebSockets (STOMP) for real-time task updates and notifications.
- Integrated Cloudinary API for image hosting and Axios Interceptors for session handling.

**Tech Stack:** Spring Boot, Spring Security (JWT/OAuth2), MySQL, React (Vite), TailwindCSS, WebSocket (STOMP), Cloudinary.
